## THOUGHTS ON URANIUM MINING.

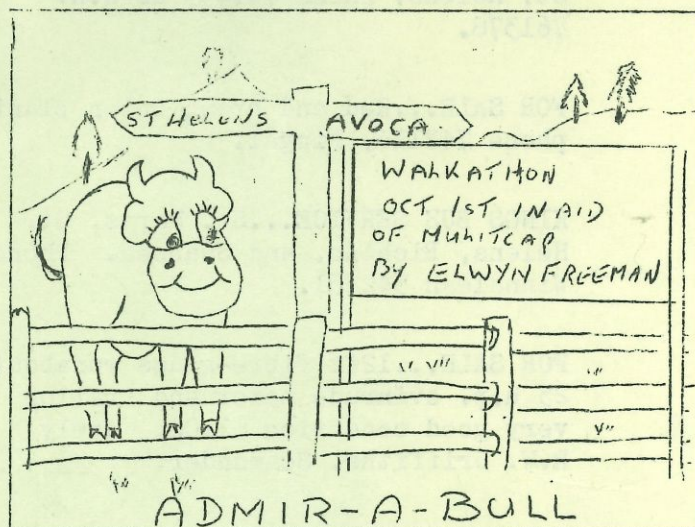

Do we know enough about uranium? What do we know about the health of the men who get it out of the earth? Do we know about people who have reactors in their home towns? What about the dust? You can't mine anything without dust? Does this make people ill? Or doesn't it affect them at all? What do the Aborigines really think about it? Its on their ground, they must have some ideas about it, their elders would have tales of devils or something like that about particular areas.

It's cold and cruel stuff to handle, and perhaps we are not sure yet about the best way to handle it.

What does the waste do? How much has been buried in our country? These Multinational Groups who are so keen to lay their hands on anything they can make money out of, and as cheap as they can get it, do they care if the miners die? Or the Aborigines? They have no responsibility for illness, schools, housing, the elderly citizens, or any of these ideas, it's not their country, so they grab what they can get, the money is not used where they grab, its sent some place else like a Swiss bank. Our people have to manage as best they can on what's left, like other under-developed countries who have been exploited by money hungry robbers.

Leave our uranium in the ground for some years yet, and lets look at other sources of energy, what about menthane gas? There is lots of sewerage about, and ccuncils are very concerned about getting rid of it.

Make menthane gas out of it, and what's left will make fertiliser for forests, farms and gardens.

It's not so expensive as Uranium and there is no waste. But it's not a big grab but some people may think of something else besides the power that goes with lots of money.

Then there are other things like wind and sun, both very energetic, this needs thinking about, which is dashed hard work anyway.

### PARDON YOUR SLIP IS SHOWING

A friend of ours is forever polishing his car and tinkering with it. So he was dismayed when it had to go into a garage, to be repaired for a week. "Never mind dear" consoled his wife, "Maybe they'll have visiting hours".

# ST. MARYS DISTRICT HOSPITAL

Following it's recent 50th anniversary celebrations, the Board of St. Marys District Hospital wishes to thank the people of the community for supporting its celebrations.

As the name implies, the hospital belongs to the district and the support of the public is a vital part of the hospital's success over the past half century. The present Board believes that the hospital must become more community oriented over the next few years; to be less of an "institution on the hill" and more of a "community health centre" in which people can be involved in a direct way.

The public is already involved in the running of the hospital by virtue of local residents being the Board of Management. The Board members are representatives of the community, giving the community a direct voice in the hospital's administration. Any member of the community can, therefore, effectively become involved by talking with Board members and making the community opinions, expectations and desires known to the members.

There are seven people on the hospital Board. Five are appointed there by the Minister of Health and two are elected locally, one being elected from the Council and one being elected from the Ladies Auxiliary.

The term of the Board is two years, so each two years the Minister either makes new appointments or reappoints the same people. The present Board's term expires in June '78 and its members are Allan Jackson Chairman,

Robert Legge, Amy Jarvis, Stephen Salter, Kath Lohrey, Denzil Casboul, and John McGiveron.

You are invited to talk with your Board representatives, to ask questions, make your opinion known and to become involved with your hospital.

## RETURN THANKS

THE LIONS CLUB of St. Marys wishes to thank the very many people in the area who contributed to, and supported generously, the auction on the 10th September, 1977 conducted to assist Multicap Entrant, Elizabeth Legge, in her fund raising efforts.

Due to your support the venture was a resounding success.
