## EDITORIAL

Two meetings were held last week one at Fingal and the other at St. Helens, as part of the North-East Recreation Study. The Study is being undertaken by the Tamar Regional Master Planning Authority for the State Government's Division of Recreation, and the Northern Organisation of Councils. The Study region corresponds approximately with the 003 telephone district.

The aim of last weeks meetings was to work out when possible solutions to the district's recreation problems identified at meetings held at Fingal and St. Helens in August. All meetings were attended by a range of people from different parts of either the Fingal Valley, or the St. Helens - Pyengana - Scamander area.

The main result of the Fingal meeting was that it was decided to set up a Valley committee to apply for funds from the Community Youth Support Scheme to employ someone to carry out a survey of the needs of young people in the valley, and also to initiate youth activities for a trial period. Rev. Allan Colyer was chosen as chairman. The committee will be publicizing their activities through the Valley Voice.

Another result from the meeting was related to the lack of outside stimulation from sports coaches, arts/crafts tutors etc. It was pointed out that the Div. of Recreation's Northern Regional Office would be able to help in finding suitable visitors, and arranging for them to come to the Valley to help local groups. It was decided that the existence and role of the Division should be publicized so that people would know how it could help, and how it could be contacted. Therefore a sheet will be produced to provide this information and will be available to the local community from Branch Libraries, the Council Chambers, and Post Office.

The main result of the meeting at St. Helens was that it was decided to set up a local committee whose task would be to seek, receive research and process suggestions or ideas from the districts sporting and recreation clubs, or from individuals, about leisure problems or opportunities in the district.

David Reid was chosen to be in charge of the committee. The committee will be publicizing its function and asking for submissions soon.

The problem of lack of activities for young people was discussed, but it was decided to wait and see what ideas or suggestions relating to this problem were received by the new committee.

Three representatives from each meeting will join representatives from other parts of the N.E. Region in Launceston in December where they will meet with the Minister responsible for Recreation, as well as Government Department officials, and discuss regional recreation problems arising from the study.

The Study will be completed at the end of the year.

Nothing is more reasonable and cheap than good manners.

## FISHING NEWS

Forthcoming events:- 6th November (next Sunday) Seamander Angling Club bream contest at Seamander River from 12 noon to 6 pm. 13th November St. Helens Surf Angling Club surf contest at Swincart Beach from 12 noon to 4 pm.

In the last edition of this paper, that Grenlin scored again when two lines of my copy were omitted so please Mr Editor keep a careful watch for him. It confuses the readers.

Mr. Peter Spillsbury has again donated trophies for a casting contest and in the New Year, Seamander Club will have a special day to decide this event. There have been no contests lately & reports of catches are as rare as the proverbial hens' teeth but this extract from "Australian Fisheries" may be of interest. A recent survey of amateur fishermen in N.S.W. shows that at least 30 per cent of the population goes fishing for recreation. The survey indicated that recreational fishing is a big industry probably as important to the economy as the professional fishing industry. In N.S.W. in the past 12 months, more than 20 million days were spent fishing for fun. If each amateur fisherman spent as little as a dollar a day on his sport for goods & services, this makes recreational fishing worth tens of millions of dollars to the economy. The survey confirmed that amateur fishermen were an extraordinary significant social group & the basis of a big industry. This was why the N.S.W. Government had given State Fisheries full departmental stature to cater better for the needs of amateur fishing. (Unquote) Perhaps, our Tasmanian masters will do something similar for us & we will no longer be regarded as the poor relations.

DAVID LLEWELLYN is standing as a Federal Labor candidate for Wilmot. He is a St. Marys boy, born here and went to school here. His people still live at Cornwall. David has been a keen sportsman, playing football, cricket, & hockey. A member of the Australian Labor Party for many years, he has a great interest in social welfare. This has led to an active involvement in community work. He is a church warden and lay reader in the Anglican Church. David has a background in electronic engineering and industrial relations and is employed as a senior technical officer in broadcasting & television.

## TOUCHE!

Our local telephone technician currently enjoying a little holiday and relaxing (?) at Scamander was in attendance at the Hobart Show and was required to answer the "call of nature".

Now, we don't know whether time was running out or he didn't read the signs, but he wandered into the ladies. He is renowned for making snap decisions, so made one then and carried on regardless. Then to cap it off, as he was leaving, he met a lady coming in and oh so very politely said, "Excuse me".

## LIFE AT THE TOP END

The life style at the top end of Australia, due naturally to the different climate, differs greatly to that of the style of life experienced by people down South. Here we virtually only have two seasons; them being the wet and the dry. At the moment we are in the middle of the dry season, which as far as I'm concerned is quite enjoyable.

There has not been any rain for just over three months and the temperature in the coldest part of the year, June, ranged from 14° overnight to a high in the late twenties during the day. At present the weather is getting warmer with temperatures during the day hovering around 38°.

I expect to be here another six months, giving me the opportunity to experience the hot and humid wet season starting in November. I'm not exactly looking forward to it, as apparently the humidity at night makes it extremely difficult

The six months of summer enables outdoor activities a pleasure, with boating, camping and outdoor sports. Barbecue parties and Hungies are a continuous form of entertainment, and the warm climate encourages the consumption of vast quantities of the "amber fluid".

Beer from all states except Tasmania are available as the 1,200 Europeans here come from all over Australia. ( I have yet to meet a person born in the Territory )

The Island is scenic, the climate enjoyable, but nothing can compensate for the isolation, as your only link with the outside world is by air.

A Russian named Rudolf looked out of a boarding-house window and announced: "It's raining". "No it isn't," said the landlady. "That's sleet, that's is not rain". Her husband shook his head. "You're wrong. Remember Rudolf the Red knows raid, dear".

#### CRAZY CREATURES

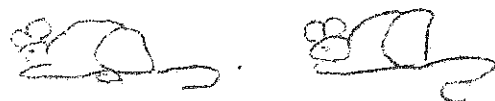

If you should meet a crocodile,  
Don't take a stick and poke him;  
Ignore the welcome in his smile,  
Be careful not to stroke him.  
For as he sleeps upon the Nile,  
He thinner gets and thinner;  
And where'er you meet a crocodile  
He's ready for his dinner.

MRS. SMITH: I hear your son is in the school football team. What position does he play?

MRS. JONES: His teacher says he is one of the drawbacks.

What a strange bird the frog are  
When is sit he stand almost;  
When he jump he fly almost;  
When he talk he cry almost;  
He aint got no sense hardly.  
He aint got no tail hardly either.  
He sit on what he aint got almost.

I'm glad the sky is painted blue,  
And the earth is painted green,  
And such a lot of nice fresh air  
Is sandwiched in between.
