## Neighbourhood Watch

### What Is Neighbourhood Watch?

Neighbourhood Watch is a community based crime prevention programme. It is aimed at minimising the incidence of preventable crime, especially burglary, within a defined area.

### Why Is It Needed

To date traditional methods of policing have proved inadequate in halting the spiralling burglary rate. Without active assistance from the public, the Police Force alone cannot hope to arrest this epidemic of crime.

### Where Will It Be?

It is anticipated that eventually Neighbourhood Watch will operate throughout Tasmania within local communities affected by burglaries where there is also a demonstrated community desire to undertake the programme. This ensures maximum protection and assistance in the fight against crime. Many areas in Metropolitan Hobart already have Neighbourhood Watch established. Additional areas will be implemented where there is a high rate of burglary and community interest.

### How Does It Start?

The level of interest amongst residents is canvassed, and a public meeting is called. Volunteers are invited to assist with the implementation of the Programme. To facilitate the Programme, an area is defined. From the volunteers, an Area Co-ordinator is elected who is responsible for liaison and information exchange between Police and residents. Zone Leaders are selected and are responsible for fostering co-operation between the residents and their zones, administration of committees, and liaison with the Area and Police Co-ordinators.

### What Is Involved?

Residents of Neighbourhood Watch areas are

educated in crime prevention, and through four basic steps, become involved in an active way by:-

- 1 Participating in Operation Identification - the marking of valuable household items, such as a television or stereo, with their drivers licence number preceded by the letter "T" for Tasmania.
- 2 Informing residents of the incidence of crime in their area on a monthly basis and advising how to identify and report criminal activity.
- 3 Increasing residents' knowledge of practical; personal and household security.
- 4 Using Sign-posting in areas where Neighbourhood Watch operates as a deterrent to criminal intrusion.

**Neighbourhood Watch depends on a commitment to co-operation between neighbours and Police but more importantly between neighbours themselves.**

## LETTER TO THE EDITOR

SIR,

The front page article of the Valley Voice Vol 28 No 9  
needs response.

As an active member of 2 of the organisations  
mentioned I can assure Rod McGiveron that all the  
projects taken on by these community groups are co-  
ordinated. Not only between the groups but also with  
relevant bodies at Local Govt, State Govt and Federal  
Govt levels.

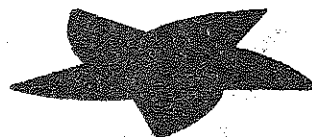

I also can assure Rod McGiveron that the groups I  
belong to are responsible community minded and work  
for the good for the whole community.

H.J. Kluber

**EUCHRE**  
**September 14th 7 PM**  
**CORNWALL HALL**

Calling all Euchre players, especially Cornwall and St Marys players. At Cornwall we run a series of Euchre, all proceeds go towards running the Hall (rates, land tax, electric power with the Senior Citizens), any money over is spent on the Hall. Perhaps the Cornwall residents would prefer a collection on houses but they would be up for at least \$40.00 per year. Why should a few keep a very nice hall in repair for those who do not care. It is a Cornwall Hall and belongs to Cornwall not the Council. Perhaps they don't care and we will lose it as we are going to lose the Anglican Church.

A night out cost \$5.00 for games, raffle, supper and a chance to win \$10.00 on a number card, a very cheap night out.

I may be treading on some toes but when you have worked for so long for the betterment of Cornwall it is very hard to see the lack of pride in a very pretty little place.

P.S. Can anyone tell me why it is so much further to come from St Marys to Cornwall as it is for Cornwall to go to St Marys?

Una Camplin.

## IT HAD TO BE SEEN TO BE BELIEVED

Last fortnight I had Graham Hayes hot house nicely balanced on my fence. The wind that night wasn't all that strong. The only branches broken off were where the hot house rested against the willow tree. The hot house approximately a 12 ft X 8 ft and about 2 chain away from my fence was lifted up, over a 5 ft fence and planted nicely on my fence- right way up and by the way it takes four people to lift it.  
Una Camplin

## LANDCARE NEWS

Jan Sparkes

Firstly, congratulations to Rick Berriman for obtaining full-time work, well done! Our LEAP group is now down to a team of five, but I'm sure they will still achieve much good work.

Secondly, September 15-17 has been set aside for the third global clean-up organised in conjunction with the UN Environment Programme, so next weekend will be a good time to reflect upon our environment and see what each and everyone of us can do to improve and clean up our environment.

Nothing could possibly appear to be further from "nature" than that band of grass and weeds which fronts most Australian suburban properties and come to be known as a "nature strip".

Even though the main function of the nature strip is to cover the essential services running under our streets, obviously they do not have to be uninteresting and boring.

Some restrictions and size of plants need to be investigated before planting as possible damage to overhead wire and underground pipes should be a controlling factor, and so curtailing that ridiculous habit of pollarding large trees simply to allow them to grow under wires.

Ground covering species which do not obstruct vision can scramble over sand, gravel or bark chips instead of grass - reduces the need to mow or water which is such a waste of energy. Tough layering plants will soon recover from wear and tear of dogs and children and will allow room for people to alight from cars.

The inclusion of non-invasive grasses such as *Poa australis* evokes a natural landscape feeling. A simple gravel path with low growing grevilleas softening the edges.

Grevilleas

*Austraflora* Canterbury gold  
*Curviloba* - known previously as *bitemata*, (white)  
*Forest rambler* (yellow-pink)  
*Juniperina* (white) are all very hardy and suitable species.

*Brachyscome multifida* (mauve) and the grey-leaved

*Helichrysum apiculatum* (yellow) look delightful.

*Asperula gunnii* - is a suckering herb reminiscent of moss which flowers in summer with small white starlike flowers. It is tolerant of shade and moist soils and poor drainage.

*Ajuga australis* - pink, mauve to purple to a height of 30 cms are a few plants suitable for nature strips.

Here are but a few ideas to help create an Australian landscape - to act responsibly, to keep Australia beautiful and create a tidy town.

## SEA FISHING FOR THE FUTURE

### What is it all about?

World-wide more and more laws are being developed to protect fewer fish and their dwindling habitat. Why? Because there is growing recognition that without action the marine resource as we know it now will not be there for future generations.

You might think that the way you fish and the amount of fish you take have little impact on fish stocks. If you were the only one you would be right, but think again. There are over 100,000 people in Tasmania who recreationally sea fish.

Together we can have a big impact, and this is why we must all share not only the catch but also the responsibility for looking after the resource.

The code is not law but a responsible guide to fishing practice for the future. It is based on what people with an interest in recreational fishing have said during 12 months of consultation. It is now time to undertake an education programme to broaden people's understanding of the points set out in this code.

Not everybody will agree with everything in the code. But no one should reject it simply because they disagree with a few points.

<p>"Not everybody will agree with everything in the code....."</p>	<p>Because this is not law, it is set out in a simple format, to remind people who fish</p>	<p>...But no one should reject it simply because they disagree with a few points."</p>
--	---	--

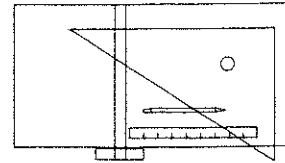

of the main points of acceptable fishing practice. If you follow these guidelines you can feel pretty confident that your fishing will not only be enjoyable, but it will also show consideration for other fishers, for other people who enjoy the marine environment without fishing, and future Tasmanians.

"The resource was not inherited from our forefathers, we have borrowed it from our children"

## Valley Saints Football Club News

U/16's Preliminary Final - After some heavy falls of rain at Longford during the week, the ground was again in good condition for footy, showing the great recuperative powers and hard work put into the Longford oval. Our Juniors kicked with the aid of a four goal breeze in the first quarter and managed just that after a nervous start, having been four goals up at quarter time, defence in the second quarter was at a premium. Our backline held out well but we were eight points in arrears at half time. The third term, which they say wins matches, ended with the team kicking inaccurately, costing the side a manageable lead at the last break, two goals five giving us just a nine point lead. Perth fought hard for the first ten minutes, our lads holding out and trying desperately to hold their lead, but when the first goal came, it opened the path for a five goal last

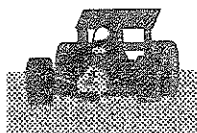

term and a win for Perth. The boys never gave up trying, but were bitterly disappointed after the game. The Seniors, although hot favourites in their game never looked comfortable in their clash with Evandale, from the first bounce we were forced to defend into the breeze, Evandale's inaccuracy in the term keeping us in the game - 5.9 to nil. Expectations were high for a good second term but soon eroded as players and spectators must have realised the trouble the side was in when it took until the 25 minutes mark of the second quarter to score our first goal, the side managing only two for the quarter. Evandale's commitment to the ball showing the way again in the third term to all but shut the Saints down with a 70 point lead at three quarter time. Our last quarter was the only time we showed any resemblance to our

seasons form, reducing the margin to 34 points at the siren. The hush in the changerooms and the disappointed faces said it all about a disastrous finals series for our new club. With time later to reflect, a disappointing season but our first year after combining saw all three sides make the finals. Some people said after the game that we had an easy run during the roster, finishing on top of the ladder, but the Club and players I feel had to work harder than any other during this first year of amalgamation.

Although no flags for any side, the main aim of the Club must have been realised - that was to field competitive sides, with large local content and keep football alive in our Valley. That I think was achieved, the flags will not be far away.
