EDITORIAL

"BE READY - 'M DAY' IS COMING!"

From next Monday, Ist July, a dramatic change will take place on Australian roads; the changeover to metrics. Will it be as difficult as many of us fear? Certainly not, if we have done our 'Home-

So let's make like Boy Scouts and 'Be Prepared'. This, like 1966's change to decimal currency, will be largely one of common sense. It needn't be painful. Metrication for the road needs to be to be the change from m.p.h. to km/h for it. For example: - A motorist approaches a bend in the highway, which has a speed advisory sign indicating 45 km/h (that's guides to the use of metrics on our roads only 28 m.p.h.), and without thinking he ploughs into the corner at the old fam iliar 45 m.p.h. - he probably won't live to tell the sorry tale! The motorist faces not only metric numbers but a range of completely new road signs and this, thankfully, will mean the first real uniformity between the states. The most important to watch ing maximum speeds. They will have black numbers inside a red circle on a white background.

The maximum highway speed in Tasmania will be 110 km/h and the general maximum in built-up areas will be 60 km/h. Both these speeds will be slightly higher than the old 65 and 35.

THE SPEED ADVISORY SIGNS, as now will display black figures on a yellow background, BUT figures will be metric, with "km/h" appearing under the figure.

metre posts will replace mile posts. Patience and understanding will be required when it comes to refuelling the car because the conversion of petrol pumps will take time. Drivers will need to be familiar with their conversion during the changeover. E.g. 50 litres = 11 gallons. All fuel and oil for the car will be bought by the litre. Tyre pressures will be in kilopascals (k P a) and one unit is equal to almost 7 pounds per square inch, thus 22 psi = 150 k P aWhen it comes to checking the car's fuel economy we wen't be looking for m.p.g not even kilometras per litre but 'litres per

100 kilometres' (1/100 km) "To calculate, take the litres used, multiply by 100, then divide by the kilometres travelled. Simple and fun! If your car now does 20 m.p.g, that will be 14.1 1/100km in future. Incidentally kilometre is pronounced "KILL-Off-metre" not as in "speedometer".

Horsepower will give way to kilowatts (kW) E.g. a 135 h.p. Holden "202" motor will be rated at 100 kW.

So "metrication" need not be "METRICKation", it can be fun; the change need not be traumatic singled out as the most important at this and full benefit will be clearly seen in the stage and its most oritical aspect appears days ahead. The transition will be a "breeze" for those who are prepared to apply a little lives will depend on our understanding of commonsense and do their homework now. Wiser, still, the motorist who rather than taking our work for all the professionally prepared

> (Correction below) It is not our intention here to go into details in depth but to get you thinking metric. It cannot be ignored; it is a fact of life that we must accept. Our willing acceptance of it will ensure a safe and smooth transition.

Our closing word of advice is:-Learn to THINK METRIC and FORGET the old imperial. It could well be that in twelve out for are the regulatory signs indicat-months' time, many will be laughing at the old imperial as we do now with £.s.d. ! £.s.d. ??? What on earth is that???

> HAPPY METRIC MOTORING CORRECTION: For all the foregoing, gets his hands on all the professionally prepared guides to the use of metrics on our roads

LETTERS TO

Dear Sir,

An idea has been put forward by a new member of the Hobart City Council - Dr. Susanne Atkins - which I would like to see adopted by our Fingal Council. This is a newsletter to the ratepayers of the Municipality, in which they would be kept in touch with the day-to-day business and plans for the future - and also the difficulties of their Council.

A Short summary, by one of the Councillors, printed in the Valley Voice every month or so, should be sufficient. This need not necessarily lead to criticism of the Council (though ratepayers are, of course, entilted to air their views) - it could mean increased co-operation and understanding, if people were better informed.

E. Thorold. (Falmouth)

RETURN THANKS

Mrs. M. Death and step-son Fred and Mrs. Hayes and family wish to thank sincerely their many friends for their cards, floral tributes and words of comfort following the death of our loved one, Harry. Would all accept our heart felt thanks. Special thanks to Sen. Constable C. D. Cornelius, Mr. & Mrs. Bob Hinds, Mr. & Mrs. S. K. Hayes, Mrs. E. Herring and Mrs. Lucy Gatty.

TOUCHE'

It is good to hear that St. Marys' lovable bearded school teacher, Ian Summers is soon to return after his serious motor accident. Ian is a connoisseur of old cars and owns eight or nine (give or take a dozen) He was frequently seen around the town in an old tourer with theorrf down before the accident. He claimed a comfortable cruising speed of 40 m.p.h., but this could easily be raised to 50 if he were to hack off his long beard (Evidently Ian has not heard of 'profile drag'.

His latest purchase is an old hearse. Local residents are 'dying' to have a ride in it. Ian hopes to use it for fishing. Two people could easily sleep in it - head to toe for it is so long. Recently an 80 odd year old fisherman quipped "At least you will be able to rest in peace."

DO NOT JUDGE TOO HARD

-by John Murray

Pray con't find fault with the man who limps

Or stumbles along the road,

Unless you have worn the shoes he wears Or struggled bemeath his load.

There may be tacks in his shoes that hurt, Though hidden away from view;

And the burden he bears, placed on your back,

Might cause you to stumble too.

Don't sneer at the man who's down today, Unless you have felt the blow

That caused his fall, or felt the shame That only the fallen know.

You may be strong, but still the blows That were his, if dealt to you

In the selfsame way at the selfsame time, Might cause you to stagger, too.

Don't be too harsh with the man who sins, Or pelt him with words or stones, Unless you are sure, yea doubly sure,

That you have no sins of your own.
For you know, perhaps, if the tempter's voice

Should whisper as soft to you

As it did to him when he went astray, T'would cause you to falter too.

EARLY FALMOUTH

Dr. Henderson had 2650 acres located to him in 1829, but he returned to India the following year leaving David Stead to manage his property and the present "Glencoe".

When Backhouse and Walker visited Stead in 1831, they mentioned there was a he called "Cape Henderson". Our Lagoon also bears the name of Henderson.

The Tasmanian Gazette of 1877 refers to Falmouth as a postal and telegraphic township. I suspect the first Post Master would have been William Lade when present. he had his store at Mariposa. I have some dates for subsequent post masters, but not for the beginning and termination of office for the earlier incum-

Archibald McIntyre who had bought "Glencoe" from Dr. Henderson in 1838 was the post master in 1849; William Lade in 1860; Mary Holland in 1887; Miss Nell Wardlaw from 1899 - 1958 (surely a record) and finally Mrs. Schierene can put a new one in its place. from 1958 until our post office was lost to us this year.

PRESS STATEMENT

Conflicting statements have arisen over the availability of Government finances for the repair of municipal flooddamaged roads in the St. Marys area. Comments have been made by some Councill ers that the Council does not have "virtually a blank cheque" to do the

Mr. Andrew Lohrey M.H.A. has said that the necessary Government money to do the repairs is available, and has been available for some time to the Fingal Council.

Mr. Lohrey has also criticised the Council for not getting on with the jobs of repairing the flood-damaged roads more quickly.

The Minister for Lands and Works, Mr. Michael Barnard and Mr. Andrew Lohrey will meet the Fingal Council at their next meeting 8th July, to clarify this matter.

PORTLAND COUNCIL - The Portland Council is seeking Mr. Lance Barnard's support in making further submission for a letter-receiver North of the Scamander bridge, Mr. Jackson, District Postal Manager, thinks at this present time this is not warranted.

PORTLAND AMBULANCE SOCIETY

Portland Council has decided to join Tasmanian Council wants to know Ambulance Services. if the Commission will allow them to raise \$1200 by a sub of \$3.00 per member as before.

NATIONAL HEART FOUNDATION

A successful morning tea was held at the Bay View Hotel, St. Helens on June 12th. This was arranged by the office bearers of the St. Helens area. Mrs. C. P. Fysh President, flag staff on the Blow Hole point, which Mrs. J. Lawler Secretary, and Mrs. N Suter Treasurer, wish to thank all the people who helped to make the function the success it was, the stall and other donations made Mrs. A. R. M. Jackson, President \$217.00. of the Eastern Group of the Foundation was The Group has raised \$400.00 over the year with morning teas.

GARDENING NOTES

For those who havn't the space or are feeling that hard gardening is beyond them, but like a green plant or two, what about container gard-This way you can change your pots ening? around to suit the weather, or perhaps the plant is dying down for its annual rest, so Quite a large range of plants can be grown in container, but to choose the plant and containers Some plants have deep to go together. roots, so need a deep po b others like Azaleas have shallow, but wide spreading roots, so they do best in a shallow pot. Hydrangeas look lovely in pots and one can get them the Petunias, and nasturtiums soil they like. are very colourful on steps. Fushsias and Ivy look levely in hanging baskets. There are hundreds of plants which grow well in pots Now for soil :- You can buy good potting soil from nurseries, but its fun to make your own, besides you know if your Get a large box plants want acid or not. and measure with one bucket or container, 4 parts (or buckets) good crumbly medium loam, 2 parts coarse gritty sand, 1 part moistened peatmoss, I part rotted cow manure, or compost, or leafmold, of planting Azaleas, ericas, pieris etc. don't like lime. Hydrangeas, lime soil for pink flowers, acid If your soil is heavy and soil for blues. inclined to cake them add an extra part of peatmoss and leave out the sand. I have found the soil under the wood heap very good for pots, its crumbly and the wood makes a good compost, enriching the soil. Pots and containers are heavy and a good way to move them is to work a shovel under the pot, then pull steadily using the back of the shovel as a sled; look out though, should it suddenly come out, you will be flat on the

For fisherman who do not often go the the Central Highlands, the expedition can be a major operation.

As no shack was available we hired a 6 berth caravan with gas fridge and stove for \$15 for three days. We three were very comfortable. However, one night there was a severe frost. I was in the top bunk near the ceiling and the cold came through so that I nearly pull enough line through top ring so that caught the flu. Arthur's Lake is about 4,000 ft. up.

After obtaining provisions we picked up the van in Launceston and set out for the Lakes, stopping only at the last tackle store in civilization to check our fly supplies. I was aghast when Allan asked the lady for a B----Mary, but she never turned a hair. I didn't know it was a kind of fly. However, she only had one of this popular type and I had to settle for a "Mrs. Simpson" to join me on my honeymoon in the highlands. True to form, all she did was divorce me from all the fish in the place when we got there. I never even saw one the first day.

Primarily I am a spinnerman. I tried practic-said. But how do you know which way a ally all the spinners and wobblers I had but all I brought up was another wobbler that some unfortunate had lost. I came to the conclusion that the only way to get a fish with a spinner in that Lake was to select a heavy wobbler, ambush your fish from behind a big rock and dong him on the head as he goes by.

It was an exciting moment when I saw the first fish caught. Allan had him on news. Careful manouvering is necessary when bringing in a fish that has taken a fly. He may be hanging only on the skin of his lip and a bit of pressure at the wrong moment will break the skin and he is off home. This one was netted after a patient ten minutes. We were all present for the post mortum. There is a careful examination of his guts to see what he has been eating of late, so we will know what to tempt his brothers with. This fish was full of beetles - the sort that fly around the light in your home on a warm night. It didn't take long to work out that these beetles were being blown off the lakeside trees onto the water where the fish were waiting to pounce.

Up to this moment we had thought that DUNS might have been the done thing up here because you can have it back". there were so many about. For the uniniated let me explain that a newt comes up from the logs and rocks at the bottom of the lake and sits on the water like a pyramid. At that stage he is a DUN, and at this stage he is likely to be sucked in - by a fish. If he survives long enough he completes the natching and spreads his new wings and off he goes as a mayfly, and if he dares too close to the water again a fish will jump out and mab him. However, now that we knew they were after beetles we started to cast beetles out on to the waters. It paid off for my companions but for a tryer like me there was nothing doing.

It is all very well for the experts to say, "It all depends on the way you present the fly to the fish - ". Casting a fly should have been easy for me - after allmy father was a bullock driver and very good with the whip. I know some fishermen are ambridextrous but I am not even dextrous. After attaching the reel to the rod, you the spring in the rest of the line - the thick part does not drag it back before you can get the fly tied on. "First of all," they said, "Find your fish." farcical I thought. When you cannot tell

the swirl of a fish from a wave caused by the wind, you are at a disadvantage. At last I felt sure I had sighted a fish moving around so I clambered down over the logs and stones till I was over knee deep in the lake. Yes, there was certainly a fish there. Not only did he swim around in front of me, the little show-off jumped clean out of the water to prove it. "Place your fly in front of the fish," they fish is going to take off. I probably would hit him in the tail. Trying to be mindful of the dead trees around me, I carefully worked that line out to a spot where I had last seen the fish and made my cast. The fly went out alright but alas, the top section of the rod went with it. What a mess!

So I had to pull it all in and start over again, goodness knows where the fish had gone by that time. As luck would have it he was not deterred by my clusiness; he was still there looking for beetles. Quickly I re-arranged my line and cast out the fly again quite close to the fish really; and I stood and watched closely. At this point I nearly fell over in the water. I looked down at the uneven bottom to see what was going on. When I looked up again the fly was no where to be seen and there was a ring on the water where the fish had been. As instructed I counted "One..Tvo" then struck, but I had too muck slack line and when I pulled it in the fly came but the fish, oh no! He had had too much time, and he said "your old fly is not as tasty as some around;

He came again but this time further out. As I tried hard to get my line out just a little further I over did it and the fly got stuck in the long grass on the bank. As a stood there getting untangled, there was a mighty splash behind me. I looked round in time to see that fish re-entering the water.and I could swear he was wearing a grin from fin to fin.

That was enough insult for one day. I packed up in disgust and telling the others where the fish had been playing, I sneaked off.

FISHING NEWS

Scamander Angling Club held their Annual General Meeting and Dinner at the Scamander Hotel-Motel last Saturday. Office bearers elected were: - Patron: D.E.C. Scott, President: G.R. Gadsby, Vice President: G. Luck, Secretary: A.R. Jackson, Treasurer: W.J. Stone, Committee: Messrs H.-Gratzer, C. Brown, F. Hayes. Members decided to raise the annual subscription to \$1.00 and the entry fees for contests to 60 cents for members, 20 cents for juniors and 80 cents for visitors. After the meeting was concluded, 62 members and wives enjoyed a smorgasbord dinner. The annual trophies'were presented and dancing followed.

This reporters not qualified to comment on the general attractive attire of the ladies. A copy of the annual report presented by the secretary follows:-

ANNUAL REPORT FOR YEAR 1973/74

The Club has experienced another successful year despite adverse weather conditions. Membership stands at 96, this being a slight increase over last year.

During the year, ten surf and three bream contests were held with a total entry of 331 i.e. an average of 26 per contect. In addition, one scheduled surf convest had to be cancelled due to bad weather. A total District School P & F. Assoc. was held of 47 trophies were presented, not including at Fingal. those to be awarded tonight at our dinner. Catches were somewhat disappointing due to the continual Easterly winds - in fact on 30th December when a combined surf and bream contest was held, no fish were landed on the beach. However, the heaviest scale fish caught during this season, is the heaviest weighed-in since the Club was reactivated in 1971.

The Committee was grateful for the support given by members and their friends at the various contests. We also appreciate the donation of trophies by several members and supporters. Special mention should be made of the following: Mrs. Reynoldsfor the doll which will be raffled tonight -Mr. Don Smith for the loan of scales for the last three years - the "Valley Voice" for printing our fishing news - Mr. John Skoda and his staff for their interest in our annual dinner.

The Committee look forward to another happy year for 1974/75 and the season will start with a surf contest at Four Mile Beach on Sunday 28th July from 12 noon to 4pm.

MARYS GARDEN

The Monthly Meeting of the St. Marys Garden Club held on June 30th had a good attendance. The floral art and other exhibits were judged by Mrs. Colleen Barnes. Results as follows: Floral ArtA: 1st, Mrs. A. Llewellyn, 2nd, Mrs. M. Royle, 3rd, Mrs. Llewellyn. Floral Art B: Mrs. K. Lohrey 1st, & 3rd, Mrs. L. Mitchell 2nd. Single Bloom: 1st, Mrs. M. Aulich, 2nd Mrs. Rattray, 3rd Mrs. Llewellyn. Extra Competition (Arrangement with 3 articles only): 1st Mrs. M. koyle, 2nd Mrs. A. Llewellyn, 3rd Mrs. M. Oliver. Home Products: 1st, Mrs. M. Royle 2nd & 3rd. Vegetable (Turnip) 1st & 2nd Mr. P. Llewellyn, 3rd Mrs. L. Rattray. Any other Vegetable: 1st Mrs. Rattray, 2nd Mrs. M. Royle, 3rd Mr. P. Llewellyn.

Next month's meeting will again be held at 2.30pm in the afternoon July 18th. Competitions are: Single Hoom: Marigold, Special Arrangement: Winter Scene, Vegetable: Carrot, Home Products: Pumpkin Scones.

PARENTS & FRIENDS ASSOC. MEETING

This month's meeting of the St. Marys

At the meeting the Principal, Mr. D. Williams, expressed appreciation to the P & P on its provision of equipment to the school in the last year. Items included a Super 8 camera, editor, projector, dressmaking models, books and games, electric power drill, stage lights, photocopying machine, and the sealing of basketball and tennis court areas. Consideration was given at the meeting to the School Fair. It was decided that this year it should be held in the Community Hall instead of the School Hall. The date selected was October 18th and it was proposed that each area shouldprovide a stall at the Fair.

L. P. BRANCH FINGAL

The Fingal Branch of the A.L.P. was asked by the Minister for Housing to conduct a survey of houses required for the 75 - 76 programme. This was done and the result was sent in by the 31st May as requested.

The Branch is now in receipt of a letter from Mr. Lowe, stating that the result of the survey has been passed on to the Director of Housing for full consider-
